Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/578,497	Applicant(s) FISCHER ET AL.	
	Examiner YONG CHU	Art Unit 1626	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 May 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claims 1-19 are currently pending in the instant application.

Election/Restrictions

Restriction is required under 35 U.S.C. 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Claims 1-19 are drawn to more than one inventive concept (as defined in PCT Rule 13), and accordingly, a restriction is required according to the provision of PCT Rule 13.2

PCT Rule 13.2 states that the international application shall relate to one invention only or to a group of inventions so linked as to form a general inventive concept (requirement of unity of invention).

PCT Rule 13.2 states that unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features.

Annex B, Part 1 (b), provides that “special technical features” mean those technical features, which, as a whole, define a contribution over the prior art.

Annex B, Part 1 (e), provides combinations of different categories of claims and states:

Art Unit: 1626

“The method for determining unity of invention under Rule 13 shall be construed as permitting, in particular, the inclusion of any one of the following combinations of claims of different categories in the same international application:

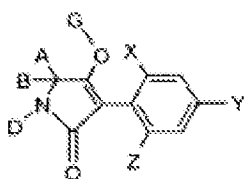

(i) in addition to an independent claim for a given product, an independent claims for a process specially adapted for the manufacture of the said product, and an independent claim for use of the said product, or

(ii) in addition to an independent claim for a given process, an independent claim for an apparatus or means specially designed for carrying out the said process, or

(iii) in addition to an independent claim for a given product, and independent claim for a process specially adapted for the manufacture of the said product, and an independent claim for an apparatus or means specially designed for carrying out the said process,...”

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The instant application is related to a compound of formula (I)

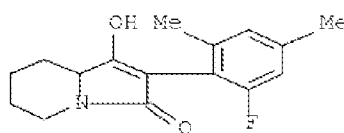

according to claim 1, a process for preparing compounds of the

formula (I), a method of using said compound, and an intermediate for making a

compound thereof. The special technical feature of the invention is a compound of the

formula (I). However, this technical feature is not a special technical feature, because it

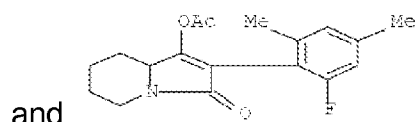

fails to define a contribution over the prior art reference of U.S. Patent No. 5,142,065 by

Fischer et al., with specific compounds

(CAS RN 129008-39-5)

Art Unit: 1626

(CAS RN 129009-24-1) as herbicides which render the

instantly claimed scope of invention obvious. Therefore, claims 1-19 are not so linked as to form a single general inventive concept and there is a lack of unity of invention.

The following groups are restricted, and are subject to further restriction if necessary, due to the variables of **X, Y, Z, A, B, D** and **G**.

Group I: Claims 1-5, and 8 are drawn to a compound of formula (I) or a composition, pesticides and/or herbicides comprising a compound thereof.

Group II: Claim 6 is drawn to a process for preparing compounds of the formula (I) according to claim 1.

Group III: Claims 7 and 11 are drawn to a process for preparing pesticides and/or herbicides comprising a compound thereof.

Group IV: Claims 9 and 10 are drawn to method for controlling animal pests and/or unwanted vegetation by using a compound of formula (I).

Group V: Claims 12-14 are drawn to a composition comprising a compound of formula (I) and at least one more crop plant compatibility-improving compound according to claim 12.

Group VI: Claims 15 and 16 are drawn to method for controlling animal pests and/or unwanted vegetation by using a composition according to claim 12.

Group VII: Claims 17-19 are drawn to an intermediate for making a compound of formula (I) according to claim 1.

Art Unit: 1626

Applicant also needs to elect a single compound as the elected species for initial search purpose.
